(a)
share of awarded regions with a positive price
d = 1, K = 2, instance C
d = 1, K = 3, instance D
d = 2, K = 2, instance C
d = 2, K = 3, instance D
d = 3, K = 3, instance D
instances C and D have the same second capacity to within 0.007, and differ only in K
d = 1
d = 2
d = 3
horizon, $\log_{10} n$
(b)
platform revenue per round
dotted: the $M_{(2)}$ benchmark of instance C
horizon, $\log_{10} n$
